

Vadmin 3.0 Content Management

Vadmin 3.0 Content Management allows you to update website content, pages and sections on your website. This is achieved easily and efficiently, from any computer with an Internet connection.

Vadmin 3.0 Content Management is available in three versions: Basic, Standard, and Enterprise.

Key Benefits

Reduce costs

With Vadmin 3.0 Content Management you don't pay for a third party to update your content.

Save time

There is no need to wait for someone else to update your website content - the changes you make are instant.

Consistent branding and quality

Vadmin 3.0 Content Management uses technologies to help keep your branding consistent and content quality at a high standard.

Improved marketing

Turn your static website into a dynamic marketing tool that keeps your clients coming back.

Reliability

Vadmin 3.0 Content Management has been independently verified for use on Windows 2003 Server.

Easy to use

You don't need to be a computer expert to use Vadmin 3.0 Content Management - anyone can do it, its that easy!

Accessibility

Because Vadmin is web based, it does not need to be installed on an individual computer. This means no per email costs, and no installing software. All that is required to access Vadmin 3.0 Content Management is a computer with a browser and an Internet connection!

Key Features

- Update your website content easily
- Create new pages and website sections
- Hyper linking tool for linking to internal or external web pages and documents
- Image and file upload systems for uploading and inserting images and files such as PDFs
- Supports multiple website design templates
- Supports multiple dynamic navigation menus
- Includes multi-tiered role based security for managing content editors, including document approval for edited content

Technology

Vadmin 3.0 utilises the latest and most reliable technologies available. Built in ASP.NET, it is a 3-tier architecture developed in a 100% managed environment. It employs an SQL database back-end, and an ASP.NET Application Server front-end.
